Different kinds of experiences lead to different brain structures.

-Dr. Bruce D. Berry, Baylor College of Medicine

“Children raised with the computer “think differently from the rest of us. They develop hypertext minds. They leap around. It’s as though their cognitive structures were parallel, not sequential.” . . . “Linear thought processes that dominate educational systems now can actually retard learning for brains developed through game and Web-surfing processes on the computer.”

Where's the Library?

by David Kohl

Available online 10 February 2006

When my son was young, he went through a phase of enjoying the "Where's Waldo?" books. He liked looking through the complicated pictures to find the elusive Waldo. At the time, I thought it was a form of prereading, a mimicking of his parents whom he constantly saw engrossed in books. Now, I am not so sure. He may have been preparing himself for his later infatuation with video games where finding secret passages and devices was also important. Possibly the hardest part of growing older is having your fond illusions fade in the light of new data.

Recently, it has seemed to me that the academic library is beginning to take on a Waldo-like aspect. It is getting hard to

new reality—but almost without exception, they are not housed in the library. They can be accessed in the library certainly (as well as from dorms, faculty offices, campus computer centers, at home, in conference hotel rooms, and even while traveling—if you have a Treo or Blackberry), but they are housed primarily on publisher and vendor servers. To the best of my knowledge, only two library entities in North America house significant collections of digital journals on their own sites—OhioLINK and the University of Toronto. Worldwide, there are a handful more of locally loaded, nonpublisher/vendor collections. The journal collection is simply mov

Babil'den 'Kütüp-Uzay'a

From Babylon to 'Libre-Space'

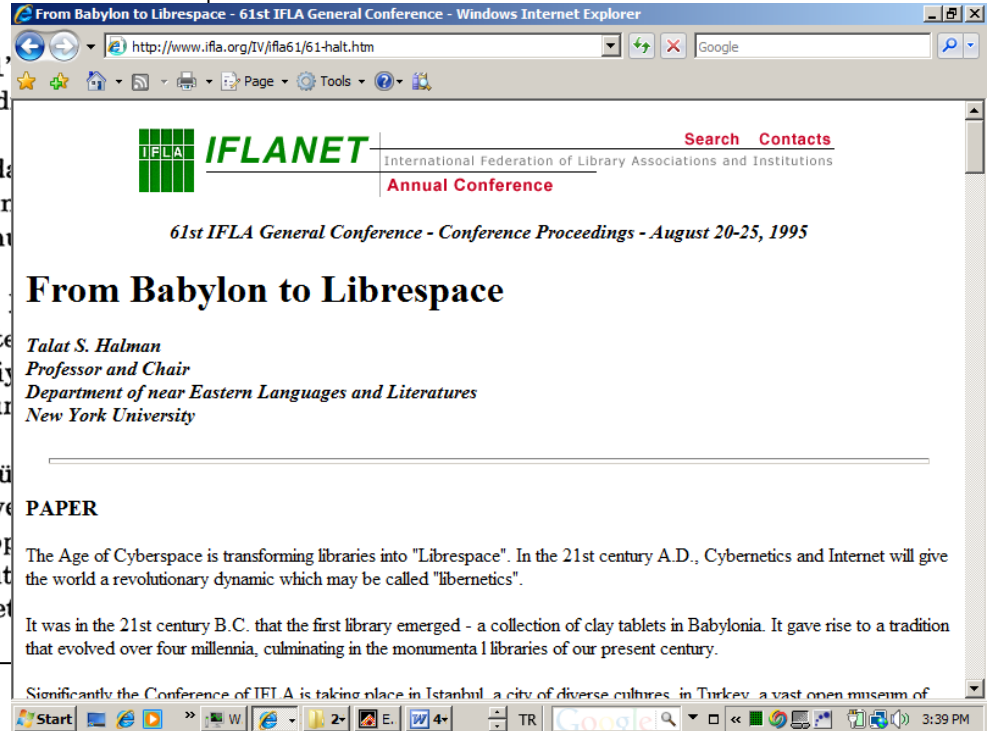

Talât Halman*

Siber-uzay çağı kütüphaneleri kütüp-uzaya çevirmekte. M.S. 21'inci yüzyılda Sibernetik ve Internet, dünyamıza belki de kütüp-netik adıyla devrimci bir ivme kazandıracak.

Dünyanın ilk kütüphanesi M.Ö. 21'inci yüzyılda Babilonya'da oluşmuş, bu başlangıç dört bin yıldır bir gelenek olmuştur. Bu başlangıç dört bin yıldır bir gelenek olmuştur, içinde bulunduğumuz çağın anıtsal kütüphanelerinin ortaya çıkmasıyla sonuçlanmıştır.

Uluslararası Kütüphanecilik Dernekleri ve Kuruluşları'nın 1995'te İstanbul'da düzenlenen 61. Genel Konferansı, anlamlı bir şekilde, çeşitli kültürlerin birlikteliğiyle bir kent olan İstanbul'da, uygarlıkların açık müzesi olan Türkiye'de yapılmıştır. Babil ve oradaki kütüphane de Türkiye'nin güney sınırında çok uzaklarda değildir.

Yalnızca Babilonya değil, aynı zamanda muhteşem tarihi kütüphaneleriyle haklı olarak övünen eski Mısır, Kudüs, Ninova, İskenderiye, Antakya, Bizans da daha sonraları Türk Osmanlı İmparatorluğu toprakları birer parçası olmuştur. Bergama ve Efes ve daha birçok eski kütüphane görkemle ayakta durdukları yerler bugünkü Türkiye Cumhuriyeti'nin içindedir.

Libraries and museums in the flat world: Are they becoming virtual destinations? ☆

Yaşar Tonta

Department of Information Management, Hacettepe University, 06800 Beytepe, Ankara, Turkey

ARTICLE INFO

Article history:
Available online 26 June 2008

Keywords:
Libraries as virtual destinations
Museums as virtual destinations
Digitization of cultural heritage resources

ABSTRACT

In his recent book, "The World is Flat", Thomas L. Friedman reviews the impact of networks on globalization. The emergence of the Internet, web browsers, computer applications talking to each other through the Internet, and the open source software, among others, made the world flatter and created an opportunity for individuals to collaborate and compete globally. Friedman predicts that "connecting all the knowledge centers on the planet together into a single global network... could usher in an amazing era of prosperity and innovation". Networking also is changing the ways by which libraries and museums provide access to

The bursting of the dot-com bubble in the fall of 2001 marked a turning point for the web. Many people concluded that the web was overhyped, when in fact **bubbles and consequent shakeouts appear to be a common feature of all technological revolutions**. Shakeouts typically mark the point at which an ascendant technology is ready to take its place at center stage. The pretenders are given the bum's rush, the real success stories show their strength, and there begins to be an understanding of what separates one from the other.

The concept of "Web 2.0" began with a conference brainstorming session between O'Reilly and MediaLive International. Dale Dougherty, web pioneer and O'Reilly VP, noted that far from having

(CNN) — The social networking site Twitter again stole a march on traditional media when it was the first outlet to publish dramatic pictures of the Turkish Airlines crash.

Moments after the plane crashed at Amsterdam's Schiphol airport on Wednesday morning the news was appearing on Twitter, iReport's International Correspondent Errol Barnett said.

"This is a story that broke on Twitter first and continued to unfold from there. Eyewitnesses were posting comments about the shock of seeing the plane 'dive' and amazement of passengers walking out of the wreckage," Barnett said.

"It was a dramatic image of a fractured plane posted on Twitter.com that was the first worldwide view of the Turkish Airlines crash. It was snapped by an eyewitness driving on the nearby A-9

...when CNN saw the image it moved quickly to confirm with Dutch officials that a crash had happened. "Within minutes we were reporting on the story. We then confirmed with the Twitter user that the image was theirs and took it to air. "This proves that social networking sites can be a real asset in covering breaking news and gathering eyewitness accounts but the web should always be treated with extreme caution."

PEER-REVIEWED JOURNAL ON THE INTERNET

Always on: Libraries in a world of permanent connectivity

by Lorcan Dempsey

Abstract

Mobile communication has been more widely adopted more quickly than any other technology ever (Castells, *et al.*, 2007). It represents a diffusion of communications and computational capacity into a growing part of our research, learning and social activities. It has resonated with emerging youth behavior, providing support for distinctive patterns of social interaction and group formation, information use and personal expression.

Diffuse networking changes how we coordinate our resources to achieve goals. For example, our use of time and space changes. Timeshifting is routine as students may listen to or watch lectures in the gym or on the train. The use of space to support ad hoc rendezvous and social learning is becoming more important.

Most widely held works by Yasar Ahmet Tonta

LCSH and PRECIS in library and information science : a comparative study by Yasar Ahmet Tonta (Book)
1 edition published in 1992 in English and held by 104 libraries worldwide
Compares the performance of LCSH and PRECIS for the books published in 1987 in the field of library and information science in order to investigate the strengths and weaknesses of each system.

An analysis of search failures in online library catalogs by Yasar Ahmet Tonta (Book)
4 editions published in 1992 in English and held by 12 libraries worldwide

Türkçe arama motorlarında performans değerlendirme by Yaşar Tonta (Book)
2 editions published in 2002 in Turkish and held by 3 libraries worldwide

Bilgi edinme özgürlüğü (Book)
1 edition published in 1996 in Turkish and held by 2 libraries worldwide

Internet and Electronic Information Management (Book)
2 editions published between 2003 and 2004 in English and held by 1 library worldwide
The number of information sources accessible through the Internet are ever increasing. Billions of documents including text, pictures, sound, and video are readily available for both scholarly and every-day uses. Even libraries and information centers with sizable budgets are having difficulties in coping with this increase. More developed tools and methods are needed to find, filter, organize and summarize electronic information sources. This paper is an overview of a wide variety of electronic information management issues ranging from infrastructure to the integration of information technology and content, from personalization of information services to "disintermediation." It discusses the issues of description, organization, collection management, preservation and archiving of electronic information and outlines Davenport's "ecological model" for information management and its components, namely, strategy, politics, behavior and culture, staff processes, and architecture.

Electronic information management = La gestion électronique de l'information (Book)
1 edition published in 2003 in English and held by 1 library worldwide

“ THIS IS A GREAT BOOK!! FULL TEXT AVAILABLE FREE! COULDN'T RESIST SHARING IT WITH THE WORLD!!

- “teknolojilerin fongirdeşmesi, iç içe geçmesi” (Ekşi Sözlük)
- Cep telefonu artık sadece haberleşme aracı değildir
- Kullanıcıların iş, öğrenim ve özel yaşamlarının yakınsaması

- Mekân olarak kütüphanenin öneminin azalması
- Bilgi kaynaklarına uzaktan erişilmesi
- Bilgi kaynağı ve hizmeti sunan rakiplerin artması
- Kütüphane türlerinin yakınsaması
- Yakınsayan teknolojilerle bilgi hizmeti sunulması
- Bilgi hizmetlerinin kullanıcıların iş, öğrenme, ev ve seyahat ortamlarına taşınması
- Kütüphane dışındaki bilgi kaynaklarının ve hizmetlerinin kütüphane içindikilerle bütünleştirilmesi
- Kullanıcılar tarafından yaratılan içeriğin standart içerikle bütünleştirilmesi

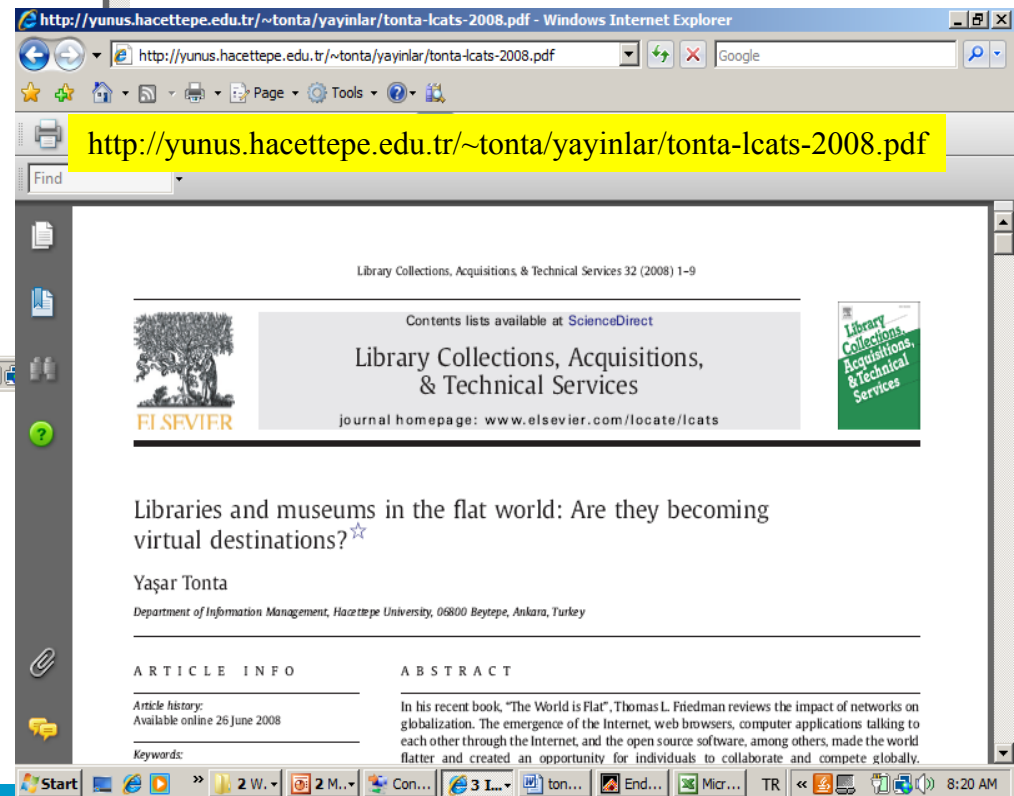

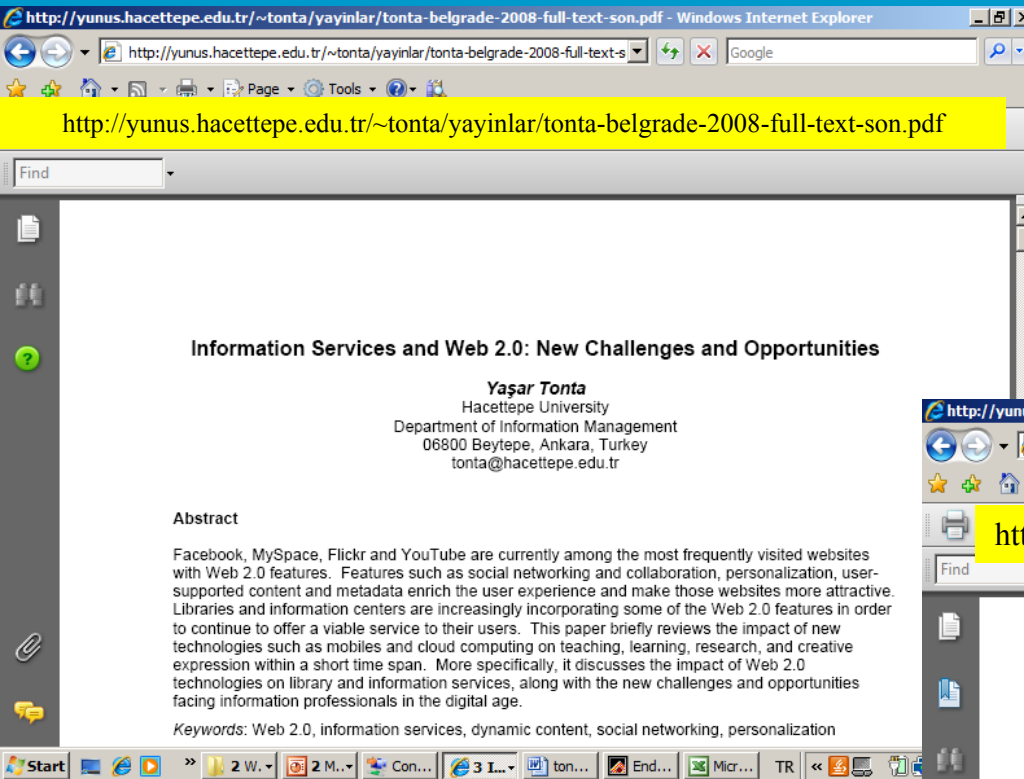

- Bilgi profesyonellerinin öneminin artması
- Daha fazla bilgi ve beceriye gerek duyulması
- Öğreticilerin ve öğrencilerin bilgi ve becerilerin hızla eskimesi
- Esnek, disiplinler arası ders programlarının yaratılması ve yaşatılması
- Bilgi yönetimi eğitiminin “Nesnelerin İnternet’i”nin ve Web 3.0: Sosyal anlamsal Web’in yaratılmasını ve yönetilmesini de içermesi

Kütüphaneleri Nasıl Bir Gelecek Bekliyor?

- Dijital yerliler daha fazla hizmet bekleyecekler
- Kütüphane kaynakları ve hizmetleri Web 2.0, Web 3.0 ve Anlamsal Web üzerinden verilecek
- Kaynak merkezli değil ilişki merkezli bir yaklaşımla bilgi hizmeti verilecek (Lagoze, 2000)
- Gerçek ve sanal kütüphane hizmetleri birlikte yürütülecek
- Dijital bilgilerin uzun süreli korunması önemli hale gelecek
- Bilgi yönetimi eğitimi “melezleşecek”

Dijital Yerliler ve Sanal Kütüphaneler: Bilgi Hizmetleri Sağlayan Kurumları Nasıl Bir Gelecek Bekliyor?
